| \$9,977.37  | Delaware   |

### Profit Trend

## Key Insights

- West Region leads in both Sales and Profit
- Technology is the most profitable category
- Consumer segment generates the highest revenue
- Sales rise strongly in the last quarter
- Profit is concentrated in a few top products

## Opportunities

- Replicate West Region success in other regions
- Improve or reduce low-profit Furniture items
- Push high-margin Technology products harder

## Business Risks

- Heavy dependence on the West Region
- Furniture category has weak profitability
- Over-reliance on a small number of high-profit products

## Recommendations

1. **Strengthen Central and South regions:** Invest in targeted marketing and sales efforts in the weaker regions, using successful approaches from the West.
2. **Review the Furniture category:** Identify loss-making Furniture products and consider reducing discounts, renegotiating costs, or discontinuing the worst performers.
3. **Increase focus on Technology products:** Allocate more marketing budget and sales attention to high-profit Technology items.
4. **Protect and promote top profitable products:** Ensure the highest-profit products have strong stock availability and visibility, as they contribute heavily to total profit.
5. **Use seasonal patterns for better planning:** Increase inventory and marketing activity in the months that historically show higher sales (especially the last quarter).
6. **Monitor discount levels more carefully:** High discounts often reduce profit. Set clearer discount guidelines, especially for low-margin categories.
